ABOUT ME

I am a Software engineer with a background in finance and tax. I am enthusiastic about designing apps that leverage data analytics to identify value and deliver practical insights and solve problems.

WORK EXPERIENCE

SOFTWARE ENGINEERING STUDENT

General Assembly (January 2024 - April 2024)
Successfully completed the full-time Software Engineering immersive program

Worked as a team to develop a full-stack, location based, real-estate affordability aggregator app. Functionality included user authentication, consuming numerous APIs and responsive web design.

SENIOR TAXATION CONSULTANT

Titan Partners (March 2018 - December 2023)

Worked as a team to deliver tax consulting and compliance solutions for ASX listed companies with annual turnover of ~\$360 million.

Transcribing large Multinational clients' tax and financial data into XML reporting schema.

In charge of data integrity for the tax compliance process for large corporate group client groups.

Applied algorithms and other data driven techniques to streamline fixed-asset register and deferred tax reporting.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, Node.js, Python

Frameworks/libraries: Django, Git, Express, React, Bootstrap, Tailwind, JQuery, Beautiful Soup, LXML

Management & Deployment: Git, GitHub, Heroku, Command Line, REST APIs

Databases: MongoDB, PostgreSQL

Methodologies:

MVC model, Object Oriented Programming, functional programming, Responsive Web Design, Authentication, Consuming APIs

KEY SKILLS:

Excellent professional and inter-personal communication skills: managing in-person and online client and regulator communications.

Team development and working as a team in general
